26 The History of Swarovski

Discover the wondrous history behind the most famous cut crystal in the world – Swarovski.

38 Wendy Bergamin

Wendy was busy making Beargamin Bears when the beading bug bit a few years ago. She now has a home-based studio where she makes beautiful lampwork beads. Antoinette Webster talks to Wendy about her leap into beading.

74 Ashlee Mouat

Tully James investigates the creative genius and inspiration behind the work of 11 year old bead designer Ashlee Mouat.

100 Community Spirit

How can something as small and humble as a bead bring people together? Antoinette Webster finds out.

118 Beads on the Street

Antoinette Webster takes to the streets of Balmain, Sydney and unearths some exquisite beaded designs on offer.

Bead Mat (Optional)

This versatile bracelet becomes a necklace - then back to a bracelet whenever your heart desires!

DESIGNER'S NOTE

Please note if you only intend on making this piece into a necklace measure your front piece of chain about 21cm or 24 full chain links.

BRACELET STEP ONE

Measure and cut length of chain to suit your wrist, this bracelet is 18cm in length but will vary from person to person. Remember to account for the toggle clasp and rings which will add another 1.3cm.

STEP TWO

Open jump ring luse two pairs of pliers, and open against each other, not away from cut). Thread one end of toggle closp and one end of the chain. Close the jump ring.

STEP THREE

Now open another jump ring and thread on other end of toggle and the other end of chain, close jump ring

STEP 4

Try the bracelet on to ensure it is the right length and comfortable prior to continuing: Hint: Each bead will be added to the chain using a large 'wrapped loop' (See 'wrapped loop instructions' on a head pin. Make sure to add the bead on the chain to hang in the same direction.

DESIGNER'S NOTE

You can either thread randomly (set out your beads first) or follow instructions to ensure no same bead sits together.

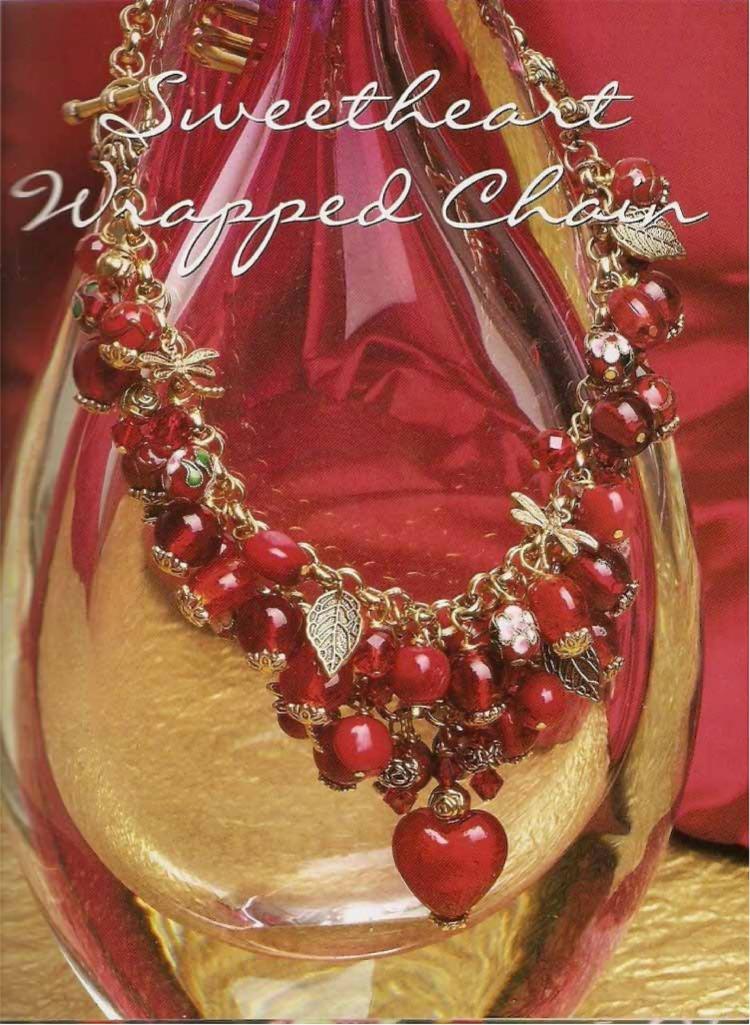

STEP FIVE

Add 8mm crystal bead (A), create a wrapped loop onto the chain (refer to 'wrapped loop instructions') and place on the first 'up' link in the chain. ** diagram **

STEP SIX

Add bead 8mm oval claisanné (C) to the second 'up' link in the chain.

NECKLACE MATERIALS

2m Tigertail

Sterling silver Catch or Fee cotch

9 x Crimp beads

BEADS

Art Glass Feature Bead

6 - 8 x 2g x seed boods different colours, shapes & sizes (total 16g approx)

16-20 z 6mm Swarovski Pearls in 2 colours

16-20 x 4mm Swarovski Pearls in 2 colours

16-20 x 6mm various coloured Czech glass boads

16-20 x 4mm various coloured Czech glass beads

1 x 8mm Czech glass Rondels

TOOLS

Crimping pliers

Wire outlers

STEP SEVEN

Add bead cap (K), then 12mm silverfoil bead (H) to the third 'up' link on the chain

STEP EIGHT

Add 6mm swaravskii crystal (D) then a 8mm metal bead (E) to the fourth 'up' link on the chain.

STEP NINE

Add bead cap (K), then 12mm lampwork bead (B) to the fifth 'up' link on the chain

STEP TEN

Now open a jump ring and thread charm (J) onto the sixth 'up' link on the chain and close jump ring.

STEP ELEVEN

Repeat steps 5-10 (5 beads; 1 charm, 5 beads, 1 charm, etc) until you have reached the end of chain.

DESIGNER'S NOTE

Once you have reached the end of chain, return to end of chain where you had started and you will now start adding bead to the adjacent 'Down' link of the chain.

STEP TWELVE

Add a charm (J) to the left, adjacent to the third bead (H) on the 'down' link of the chain. This is the storting point.

STEP THIRTEEN

Before continuing forward, you will need to fill in the one or two chain links behind the charm (step TWELVE).

STEP FOURTEEN

Add bead cap (K), then 12mm lampwork bead (B) behind the charm, then 6mm Swarovski crystal (D) then a 8mm metal bead (E) behind the lampwork bead if necessary on the 'down' chain link.

STEP FIFTEEN

Add 8mm crystal bead (A), continuing forward from the charm on the next 'down' link of the chain.

STEP SIXTEEN

Add bead 8mm oval claisanné (C) to the second 'down' link in the chain.

STEP SEVENTEEN

Add bead cap (K), then 12mm silverfoil bead (H) to the next 'down' link on the chain

STEP EIGHTEEN

Add 10mm tumbled coral bead (M) to the next 'down' link on the chain:

STEP NINETEEN

Add bead cap (K), then 12mm silverfoil coin bead (I) to the next 'down' link on the chain

STEP TWENTY

Now open a jump ring and thread charm (J) anto the sixth 'up' link on the chain and close jump ring.

STEP TWENTY ONE

Repeat steps 15-20 (5 beads, 1 charm, 5 beads, 1 charm, etc) until you have reached the end of chain.

You have now finished the bracelet. Please continue reading if you will be doing the optional necklace.

NECKLACE STEP ONE

Measure a second piece of chain to suit your required length (approx 18-20cm) and repeat steps 2 and 3 to attach another togale. You can then attach this chain to the end attachments of the bracelet.

Making a 'Wrapped Loop' Instructions Leaving a slight space (approx 2mm); place your chain nose at the base of the bead; bend the head pin 90 degree angle away from you.

Using your round nose pliers, grab the wire about 1cm from the bend and roll the wire back toward you to form a partly complete circle on the wire. We need to create a large loop "pocket" for the 6.5mm chain to sit in. Now slip chain into loop 'pocket' created.

Place the end of the round nose pliers into the loop, just above the chain (to hold the chain in place and help it from not falling in your way when you create the wrap). Using your thumb, wrap the bend on the head pin and continue to wrap wire around itself tightly, to secure the wire firmly to the bead. Cut excess off.

NECKLACE - PART 2 - OPTIONAL "V" & HEART STEP ONE

Measure & cut length of chain approx (10 full links).

STEP TWO

Open jump ring and thread one end of chain to approx the 8th 'up' link on the completed

bracelet chain from the right side. Close the jump ring.

STEP THREE

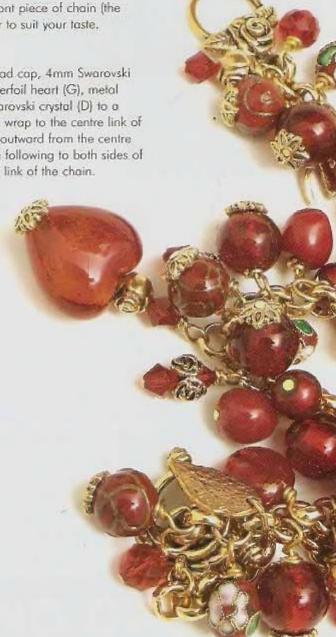

Now open another jump ring and thread one end of chain to approx the 8th 'up' link on the completed bracelet chain from the left side. Close the jump ring

DESIGNER'S NOTE

You can make the front piece of chain (the 'V') longer or shorter to suit your taste.

STEP FOUR

Start by adding a bead cap, 4mm Swarovski crystal (F) 20mm silverfoil heart (G), metal bead (E) & 6mm Swarovski crystal (D) to a 76mm headpin, and wrap to the centre link of the chain. Workings outward from the centre (heart - 'G') add the following to both sides of the heart on the 'up' link of the chain.

STEP FIVE

Add 6mm Swarovski crystal bead (D), then metal bead (E), on the next 'up' link of the chain, on both sides of the heart

STEP SIX

Add bead 10mm tumbled coral (M) to the next 'up' link of the chain, on both sides of the heart

STEP SEVEN

Open a jumpring, and attach a charm (J) to the next 'up' link of the chain, on both sides of the heart.

STEP EIGHT

Add 8mm glass bead (L) to the next 'up' link of the chain, on both sides of the heart. Now working back towards the heart on the 'down' links of the chain, add the following to both sides of the chain.

STEP NINE

Add 8mm crystal bead (A) to the next 'down' link on the chain

STEP TEN

Add 12mm silverfoil coin (I) to the next 'down' link on the chain

STEP ELEVEN

Add 8mm glass bead (L) to the next 'down' link on the chain

STEP TWELVE

Add bead cap (K), then 12mm silverfoil bead (H) to the next 'down' link on the chain

STEP THIRTEEN

Add 8mm claisanné aval bead (C) to the next 'down' link on the chain

Now working from the heart still on the 'down' links of the chain: -

STEP FOURTEEN

Add 8mm crystal bead (A) to the next 'down' link on the chain

STEP FIFTEEN

Add bead cap (K), then 12mm lampwork bead to the next 'down' link on the chain

STEP SIXTEEN

Add 8mm glass bead (L) to the next 'down' link on the chain

STEP SEVENTEEN

Add bead cap (K), then 12mm silverfoil bead (H) to the next 'down' link on the chain

STEP EIGHTEEN

Add 8mm crystal bead (A) to the next 'down' link on the chain, HINT - Remember you can add more or add less beads than the Instructions, this is up to you.

MATERIALS

45cm Soft Flex wire .019 dio.

50 x small gold caps of your choice

50 x small gold spacers of your choice

9 x lurge gold spocers of your choice

Gold vermail toggle

Gold crimps

BEADS

Venetion beads as follows:

1 x Schissa (disc) 22mm focal

1 x blue foil triangle

5 x blue coin (flat) Sommerso

6 x green coin (flat) Sommerso

2 x blue disc lentil

2 x blue 8mm foil round

4 x green 8mm foil round

25 x black 8mm Sommerso round

2 x blue 8mm Sommerso round

TOOLS

Chain (flat)nose pliers Round nose pliers

Cutters

Venetian beads always make an elegant impact.
Use beautiful greens and blues with classic black
before finishing it with gold findings to have the
most stunning winter look.

STEP ONE

Place a cap, the main pendant bead, another cap, a gold spacer, a cap, an 8mm black bead and another cap all on a long eye pin.

Make a loop at the top.

STEP TWO

Place the triangular bead with a gold barrel bead onto a long eye pin and make a loop at the top and attach it to the "eye" of the pendant above. Place a blue disc and a gold spacer on a headpin. Make a loop at the top and attach it to the "eye" of the eye pin that is holding the triangle.

STEP THREE

Hang this long drop on to the centre of soft flex wire. Place a gold spacer each side of the pendant drop, now working each side of the drop place caps and two 8mm black Venetian beads with a spacer between them, caps again, followed by a gold spacer each side. Now you need to make two matching drops to hang off the wire next to the spacers you've just added. Get two headpins and place an aqua Venetian and a gold barrel on each. Make loops at the top. Put a green disc, a gold spacer, a green bead, another spacer and a black bead with a cap onto an eye pin.

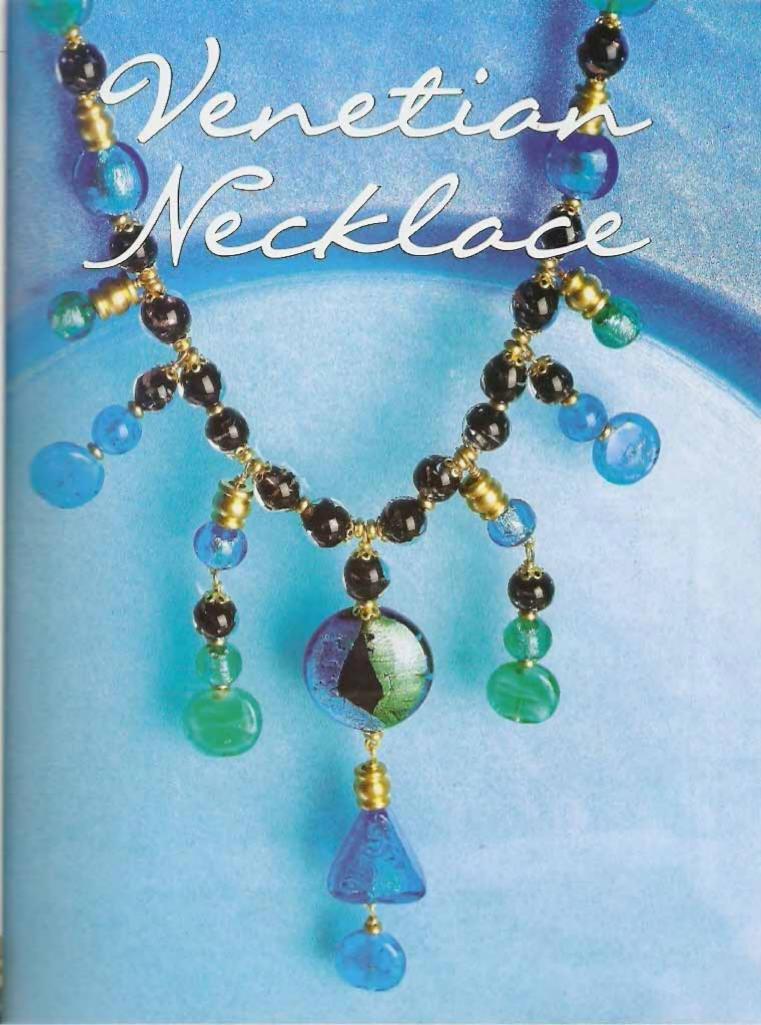

Make two of these. Attach the headpins to the eye pins to make two drops and hang these onto the wire.

STEP FOUR

Continue adding beads up each side of the wire in this order; gold spacer, cap, black bead; spacer, black bead, cap and a gold spacer.

The next drop you need to hang is made by placing a blue disc, gold spacer, a blue 8mm bead, gold spacer and a black bead onto a headpin and turning the top over to form a loop. Make two of these. After hanging both of the drops, continue threading a gold spacer, cap, one black bead, cap and gold spacer onto each end of the wire. The last two drops are made by placing a green Venetian bead with a gold barrel onto a headpin and turning the top over to form a loop. Once you have hung these drops (one each side), continue threading each side in the following way: a gold spacer, cap, black bead, cap, gold spacer, a beautiful agua bubble shaped bead, gold barrel, gold spacer, cap, black bead, cap, gold spacer, a green disc, gold spacer, cap, black bead, cap, spacer, blue disc, spacer, cap, black bead, cap, spacer, green disc, spacer, cap, black bead, cap, spacer, gold barrel, spacer.

STEP FIVE

The next step is to attach the toggle. Thread a gold crimp onto one and of the wire then thread the wire through the last chain of one side of the loggle. It does not matter which side you complete first. Thread the wire back on itself and back through the crimp and back down into the spacer and gold barrel, Pall the wire so the crimp is close to the

toggle. Use crimping pliers to close the crimp over the wire. Carefully snip off the end of the wire. Repeat this process with the other end of the wire and theother half of the toggle.

DESIGNER'S TIP

After making your main drop let lay your work out before you start on a bead board and you will find it easier to string up correctly.

MATERIALS

1 x Geneva marcasite watch face

36 x sterling silver rondel spacers

1 x Thai silver 3 hale spacer bar

1 x sterling silver toggle

2 x strands of tiger tail

4 x trimps

BEADS

42 x pink opal rondels

TOOLS

Long nose pliers or crimping pliers

Marcasite is always a timeless classic. This watch from Cosmic Beads is a wonderful start to any day.

STEP ONE

Thread a short length of tiger toil approx 20cm through the bottom watch loop and centre the watch in the middle of the strand. Thread on three pink apal randels on either side with spacers between them.

STEP TWO

Attach each side of the tiger tail to the toggle bar and firmly crimp, threading a little extra tiger tail through the last randel, HINI

Please note the tiger tail won't go back through the spacers as the hole is too small. Cut the excess tiger tail off as close to the bead as possible.

STEP THREEE

Thread a long length of tiger tail approx 30cm through the top watch loop and centre the watch in the middle of the strand. Thread on 8 pink opal randels with spacers between them.

STEP FOUR

Thread on the 3 hole spacer, using just the two outside holes.

STEP FIVE

Thread on another 8 pink opal randels with spacers between them and measure against your wrist. Add more randels and spacers if you need to:

STEP SIX

Attach each side of the tiger tail to the toggle loop and firmly crimp; threading a little extra tiger tail through the last randel. Cut the excess tiger tail off as close to the bead as possible.

The History of VAROVSKI

DISCOVER THE WONDROUS HISTORY BEHIND THE MOST FAMOUS CUT CRYSTAL IN THE WORLD -SWAROVSKI. NADIA CRIGHTON REPORTS.

Above: Bernadètte Larcher, Head of International PR.

Right: Create your Style with Swarovski pieces from the US Design Contest 2005 Cultural Firsten Design by Kalherine Song, Toronto. CRYSTAL IS FAMOUS FOR its hypnotising beauty and has been sculpted, polished and designed into jewellery and fine art for many years. Swarovski, synonymous with quality and style: have been the leaders and innovators of cut crystal for over 100 years.

THE REGINNINGS OF A NAME

Daniel Swarovski was born in 1862 in Jablonec, Bohemia, a town north of Proque in today's Czech Republic. Considering Jabolnec's long history of cutting and polishing stone for the jewellery industry, and Daniel's father owning and running a small crystal cutting factory, it's not surprising that as a young boy, Daniel dreamt of cutting and creating beautiful pieces from crystal.

He layed to watch his father work and was so inspired that he later completed an apprenticeship alangside him and other crystal cutters.

After visiting many shows and being dazzled by the crystals cutters, Daniel soon dreamt of creating a way to revolutionise the crystal. cutting world forever. So he set out to cut crystal to precise perfection in a way never done before.

Working day and night to secure his vision. Daniel was ready to etch his name in the history books. In 1892 he registered a patent machine, which for the first time, made it possible to gut and polish crystal to perfection. This machine also made the

process quicker and more accurate than any manual practise before.

in 1895 Daniel travelled to the Austrian town of Tyrol and, alongside his brother-in-law Franz Weis and Armand Kosmannstill, Jounded the family business.

A MAN OF VISION

Nadia caught up with Bernadette Larcher, Head of International PR Swarovski, to chat

about the company's interesting history, and to find out how it has grown from strength to strength over the years

Ms Larcher speaks of Daniel's work rery with y and recards him as an extremely me rational man, who is still motivating the -crk and ethics of the company nearly 60 ears offer his possing.

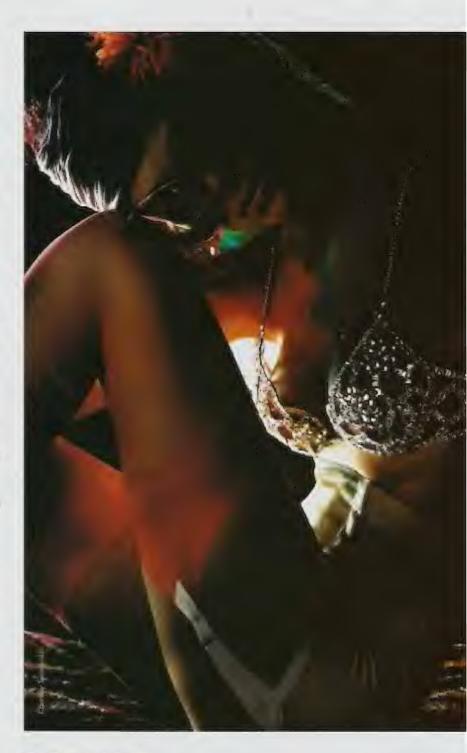

Daniel was certainly inspired growing up. a Japlanec but he was a man of vision, Uncher says. "He even went to Paris in 1880 to make contact with top lewellers. He estized his dreem by founding the company - Autria and he was always committed to allence, innovation and staying one that = ead of his competitors."

A natural entrepreneur, Daniel wanted the designs and creations would and the ta grow and inspire. So he be save a treative partner and supplier to the world's meat conture bouses and his line work and across the alohe

Elsa Schioparelli, a well known artist and Pashion designer, came to Wattens In the 197,0's to learn about how crystal was made and its tipe in jewellery.

*Coco Chanel was always intrigued with and as a creative medium and in the at costaine newellery for decorative surposes and in the 1950's Christian Diar and Swarovski collaborated to produce - Irora Borealis crystal;" Ms Larchar trailes, adding that even today, many of he world's top: luminaries of the modern way like Vivien Westwood and Karl Interfeld come to Wallens la experience "deing a reliable partner of the = ad ve world. Swarovski continues to and them with inspiration to realize evstaline fontusies."

My landler also points out that not does Swarovski continue its creative thips with top designers it also e collections 'Daniel Swarovski' and = rorovski' - jewellery, fashion and ham-With the company focussed on merchänging world, Daniel's work will provide support for the next generation bo designers.

CRYSTAL CHITLING

In 1913 the completion of the production plant allowed the Swarovski Company to produce their own crystal, meaning they could move into their next planse of business.

"Swarovski is a private company and owned 100 percam by opproximately 60 family mempers. Ms Larcher sovs in fact the current monogement. includes the lough and tith generation with all being direct descendants of the founder himself. They are also the shareholders of the company.

Europe, however, was heading into a time of great unrest with World War I storting in 1914 and not ending until four years later (1918)

During the War, Daniel struggled to lind insterials and cutting tools for his work, so in light of this he strived to develop his own. By 1917 he had produced dressing and grinding tools which were registered under the brand name ivroiir

With war fresh in the people's minds there was much need to restore the beauty and preservation of days gone by. The arts, fine jewellery and music allowed war-torn regions to return to their joys they once Linux and loved.

Culturally speaking, Swarovski the company was barn into an epoch of amazing diversity of thought and interchange between the arts, science and natural science called 'Matteleuropo'"," Ms Larcher explains. "The company continues to live by this rich cultural heritage."

A FIGUREY HERLOOM

The most tostinating aspect surrounding Swarovski, upon from the magnificent pieces of fine jewellery and sculptures, is its continuing growth. From humble beginnings to an amazina family empire. Daniel Swarovski's love and dedication to the world of crystal has inspired generations of crustal enthusiasts.

Swarnwaln is a private company and owned 100 percent by approximately 60 family members," Ms Larcher says. "In fact, the current management includes the fourth and 14th generation with all being direct descendants of the lounder himself. They are also the shareholders of the company."

A RICH HEKTAGE

We understand crystal as a creative material in its own right and as a phenomenon beyond just that material," Ms Larcher states. *Our historical legitimacy lies in cut crystal

and jewellery, both of which draw on our rich cultural heritage."

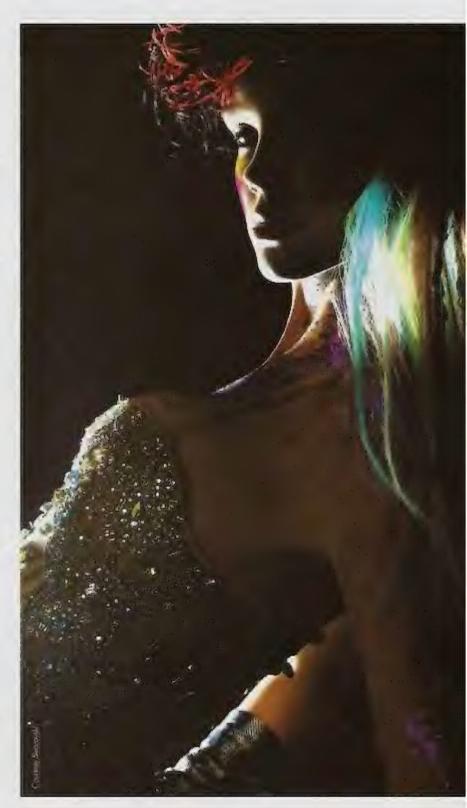

The company proudly calls their products ewels of Fantasy' and strives to accentuate abouty, joy and cultural reflection. "We adhere the principles and values of our founder our everyday working lives. To us, as a smily-run company, sustainable growth is smally important as generating profits and we need this yield into ensuring our continued existence. Our employees appreciate and arrive the benefits of this sustainability." Ms archer adds.

She is also quick to note that the spirit of Daniel Swarovski is as alive today as it was when the company founder was running the company. Swarovski enjoys success because the company espects the vision of its founder and lives by the smotto "always improve an what is already good"," she continues. "His vision is our vision. He would be proud of the company, its products and the fact that we remember and honour him by fallowing his principles."

LOOKING TO THE FUTURE

Ms Larcher says -"Giuseppe di Lampedusa (The Leopard) said, 'If we want things to stay as they are, things will have to change' Swarovski is in the situation of being the narket leader, but that does not mean we can be complacent. Instead it drives us forward to seek out new challenges. Change itself remains an angoing challenge that will require all our energy and enthusiasm. We will continue to honour our founder Daniel Swarovski and to 'take what is good and to make it even better'."

*During World War I a term known as 'Mitteleuropa' developed. This was a German term meaning Central Europe. Outside Germany the concept of 'Mitteleuropa' may be known for the policy of the Central Powers during World War I which caused the creation of buller states in Central Europe that were liberated from imperial Russia. For many industries and companies the development of 'Mitteleuropa' allowed many sectors of the community to integrate like never before.

MATERIALS

Fireline 6lb

Clasp

BEADS

70 x:4mm Bicone Crystals size (4

40 x 3mm Bicone Crystals size (3

3 x 6mm Round crystals size R6

Size 11 Delitas SB 1

Size 15 Seed beads SB2

TOOLS

Beading needle

This stunning bracelet designed by Ann Lloyd has a perfect combination of new season Swarovski colours

STEP ONE MAKING THE CLUSTERS

Thread needle with a length of fire line about 80 cm. Pick up one Erystal C4, one seed bead SB1, repeat five times making a total of six of each bead. Tie into a firm circle leaving a 10 cm tail of fire line.

SIEP TWO

Pick up one SBI, one C4, one SBI, one C4, one SB1, thread through the nearest C4 and the next SB, repeat five times forming six V shapes around your circle

STEP THREE

Pick up one C3, one SB2, pass the thread back thru the C3, and thru the C4 from the first round, repeat 11 times, making a total of 12:

STEP FOUR CLUSTER CENTERS

Take a new length of thread, and weave through the centre round of crystals. Pick up one R6 and weave to the other side, repeat for the remaining two. Weave your ends knot and hide. Hint - You can use a pearl for the centre.

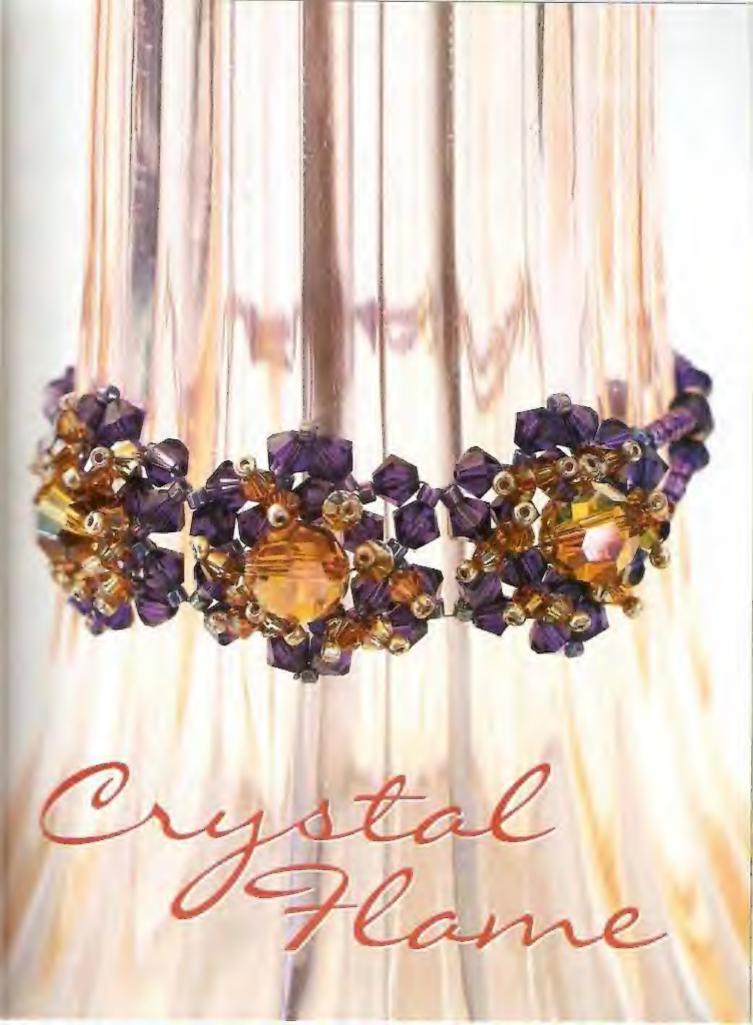

This completes one cluster. Repeat to make two more.

STEP FIVE

Join the clusters by weaving the thread through the crystal and join at two points by attaching the SB2 to each other. Weave thread and tie off, hide the thread.

STEP FLEVEN

Add eight SB 1 onto each length.

STEP TWELVE

Join both lengths of thread through the clasp, then weave back into the seed boads. Tie off and hide the tail thread, then repeat for the other side

DESIGNER'S TIP

You can adjust to your desired length by adding or removing some seed beads in the band.

this bracelet! For details see our Beads Glorious Beads Competition on pages 66 and 67.

STEP SIX MAKING THE BAND

Take a length of thread and weave into crystals where the band is to be attached, making sure both lengths are even.

STEP SEVEN

Thread eight SB1, one C4, one SB2, onto both threads

STEP EIGHT

Thread one C3 onto the right hand thread and pass the left hand thread through the C3. The threads will cross over.

STEP NINL

Thread one SB2, one C4, and eight SB1 onto each thread.

STEP HIM

Repeat step 3 and 4.

MATERIALS Nymo thread

BEADS

Approx 15g a size 9 seed beads

Fresh water pearls

Semi precious stones

A small amount of amber

Approx 125g x mixed beads in various shapes and sizes, ranging from 4mm to 8mm in all shades of green. rondels, tukes, facetted rsystals and a small amount of silver spacers.

Button hale one seed bead as a stopper bead, by threading the bead till almost at the end, then thread through the loop at the end, then continue to thread seed beads until work measures one metre. Randomly thread bead mix accasionally threading some more seed beads until complèté work measures 4

Diagram I

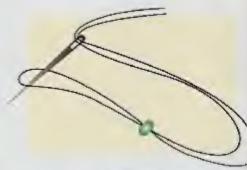

STH' TWO

metres, See Diagram 2.

Using your semi precious stone and seed beads this looping necklace is a step up for those of you who love stranding but feel confined by simple single strands

STEP ONE

This Necklace is done in double thread, so for an eight strand 50cm necklace thread the needle with 9m of thread (8m for necklace, Im for finishing off both ends). Tie a reef knot making sure that the knot is not at the end. See diagram 1.

Dioprom 2

Thread needle through the stopper bead, making a large loop, Flatten loop só both sides touch, giving the impression of having two stronds. Thread needle through the further most bend then pull tight. If you have done this properly, this will create 4strands. Repeat again on the other 2 loops. You should now have eight strands. See Diagram 3.

Diagram 3

this necklace!

TOOLS Beading needle

For details see our Boods Glorious

Beads Competition on pages 66 and 67

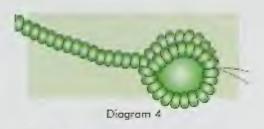

STEP FORM

To create first half of the beaded taggle and loop type clasp, thread 8 seed beads, one 8mm bead and then & seed boads. Thread back through the top of the 8mm bead and repeat till Emm bead is covered; Put on 1 seed bead and no book through to the top of the 8mm bead to cap off the ball, you are now heading in the apposite direction that you started. Put on 8 more seed beads and thread back through 1 of the strands about 1 1/2 cm: Tie a knot around the same strand. Repeat knotting about 5 times. Cut the last of the thread and tie another reet knot with knot at one side. See Diogram 4.

STEP FIVE

We will now create the second half of the clasp the loop. Using thread start at other end, button hole one of the seed beads on Laf the stronds and then through the peek of each loop. Thread on 8 seed beads, a further 28 seed beads (this is the loop for

the beaded taggle). Thread though the ninth bead from the original button hole bead where you started. Thread on another 8 seed beads and thread through one of the strands and tie off in the same manner as you did for the other side. See Diagram 5

DESIGNER'S NOTE

This also looks good in multi coloured seed beads with the odd 8mm bead randomly dotted about.

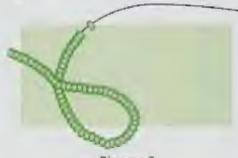

Diagram 5

Materials can be purchased at your local bead shop; expected cost of this necklace is approximately \$45 to \$50

Wigwam Beadery Shop I 16 Bideford St Torquay QLD PH: (07) 4194 6292

From Bears to Beads

WENDY WAS BUSY MAKING BEARGAMIN BEARS WHEN THE BEADING BUG BIT A FEW YEARS AGO. SHE NOW HAS A HOME-BASED STUDIO WHERE SHE MAKES BEAUTIFUL LAMPWORK BEADS. ANTOINETTE WEBSTER TALKS TO WENDY ABOUT HER LEAP INTO BEADING.

WENDY BERGAMIN LIVES IN

Victoria with her husband and two sons. She tought secondary school arts and crafts for 13 years before she took long service leave and had her first son, when she storted working from home. She now has two sons, a thriving bead and bearmaking business and "absolutely no regrets about the decisions made regarding working from harne".

HOW DID YOU MAKE THE LEAP FROM BEARS TO BEADS?

I thought that I would be able to make little fishes and other beads to put around the necks of the mohair bears that I make. Italso thought it would be interesting as it was very far removed from the sewing types of crafts which I had been doing since I gave up teaching.

At the moment the beads seem to have taken over but I haven't given my bears up, I have always felt that if I didn't feel like making something that it was pointless to push myself as

WENDY BERGAMIN - PROFILE

I never looked as good as samething that I aid want to make:

t am in my comfort zone making bears but because the glass can have some unforeseen reactions when you mix colours then I find the spontaneity of this very fascinating:

HAVE YOU NOTICED ANY SIMILARITIES BETWEEN THE BEAR WORLD AND THE BEADING COMMUNITY IN AUSTRALIA?

I have already met a lot of nice people in the bead world. The bear and bead worlds are quite similar and although I om meeting a lot of new people in the bead world (having known the bear-makers for years). I find that there are a lot of parallels in their outlooks and behaviour.

I enjoy making beads and bears and I try to out my best efforts into whatever I do but I still find it amusing to see how many people take themselves a bit too seriously. I think the word 'artist' is bandied around for too much.

HOW DID YOU GET STARTED IN LAMPWORKING?

When I did tertiary studies there weren't any hot glass areas of study, so I went to

feacher's college at Melbourne and majored in ceramics. My younger sister did a 'fine arts' course several years later majoring in hot glass, which further piqued my interest:

In late 2003, I received a brochure in the mail which advertised for bead making

"I do like making encased flower beads but I suppose my favourites would have to be the bright multi coloured beads and 'evil eye' beads. The bright colours make me feel happy."

PROFILE - WENDY BERGAMIN

classes with Pauline Delaney, so I rang and booked to do the class which started in January of 2004

After I completed one set of four night classes with Pauline I realized that my beads weren't going to look great straight off. I also realised that this wasn't going to be one of those cheap crafts where you could just buy a few bits and pieces and get to work!

I hadn't seen a hot head burner for worked on one) but I had been told that they were noisy and cooler to work with than a Propone/oxygen torch which was the type I had used with Pauline. When I looked at the cost of buying the equipment compared to the cost of doing a workshop, I decided that I had better book in to do another workshop with Pauline ... then another then another

At this stage I had decided that I was probably going to set up a studio at home, but then I saw that the first 'Bead and Gem Show' was being held in Sydney and that there were going to be workshops in bead-making there. I booked two days of workshops with Peter Minson. Peter talked about a lot of the health and safety aspects of working from home and this made me feel more confident about buying all of the equipment

In February of this year I did a two day workshop with Corina Tettinger who lives in the US. She has published 'Passing the Flame' and several other booklets about lampworking and I find the precision of her work and the way she sets out her books to be very helpful

WENDY BERGAMIN - PROFILE

negative encosed. : - Horal bead with a chroic background.

HOW WOULD YOU DESCRIBE OUR STYLES

can't find that I am drawn to one type of reading style or decoration. I like to use all of = glass colour palette rather than settling on z few colours. The beads are quite often 'one as I find that I am moving along and rying new techniques, so I rarely go back and repeat any.

1.do like making encased flower beads but suppose my favourites would have to be the aright multi coloured beads and 'evill-eye' zeads. The bright colours make me teel happy.

Some of the neckloces I have seen that incorporate my beads have been wonderful. it is interesting to see how various people use different colour combinations and types of beads. I like the work which doesn't 'play safe' but has unexpected combinations.

Iwo Australian bead makers whose work really like are Marie Claude Chapman and Carol Marando. I think that their work is in a class of its own. I would like to fry some sculptural work like Wendy Tobler's Carousel Horse Heads -but that will require a lot more technical ability before lieven contemplate that...

WORKING FROM HOME, HOW DO YOU MANAGE YOUR TIME?

I am very lucky that my husband and sons don't have high expectations regarding dustless surfaces. My main priorities are that the clothes are washed, the bills are paid, the kitchen is relatively tidy and dinner

Heavily encased amethyst floral. bood with dichroic background.

"I think we have a lot of untapped. unrecognised talent in the Women in Australia. But it is up to individuals to decide for themselves whether they want their profiles raised."

is cooked every night and that there is good food in the house.

I must admit that my circle of friends has shrunk as I spend more time working and I don't 'do coffee'. I tend to use the shows as a time to catch up with people. Working from home does tend to make you a bit of a recluse. Or maybe it is being a recluse that makes it easy for me to work from home?

In some ways it would be easier to have a job which went from 9 to 5 and then finished each day, Sometimes, if I am on a roll with an idea, it is hard to switch off and come back inside. It is also very hard to stop at the weekends or to not go back to work after dinner, especially if I have a show coming up.

I find that with bead-making, as with bear-making, you have to have a lot of selfdiscipline. There is no definite work time, so it can be tempting to spend the day talking to friends on the phone and never actually settling down to work.

HOW DO YOU MARKET YOUR BEADS?

I started my website four years ago. I have always worked on the website myself as I like to update it as soon as possible when I have new beads/bears to put on there. Selfing up the web site was a big learning curve but a very satisfying experience.

I haven't really changed my way of marketing my beads (or bears) since I started; am a strong believer in going to shows and advertising in magazines to raise the profile of my products. Unfortunately this also eats into the amount of money Limake; which sometimes makes me feel a bit resentful about people who don't advertise or support shows - but who charge prices which would reflect these expenses!

HOW DO YOU SEE THE BEADING SCENE IN AUSTRALIA?

I finink we have a lot of untapped, unrecognised talent in the women in Australia. But it is up to individuals to decide for themselves whether they want their profiles raised.

I think writing about various craftspeople in magazines is a great help. Others can read these profiles and see similarities in their own lives and think: "Hey, if they can do it then so can I."

I don't think anyone should think for one moment that it is easy. It does take a lot of hard work and let's face it -no one is going to became a millionaira making beads. It does help if you are doing something that you like and that's exactly what I am doing.

I think that everyone should try at least one class in bead-making as it would show them how much time, effort, practice and patience goes into making each of those little works of art.

Check out Wendy's gorgeous beads at shows and online at www.beargaminbears.com

BRACELET MATERIALS 90m Tigertoil

Bali silver Fob catch

2 x crimp beads

BEADS

Art Glass Lentil Feature Bead

12 x Freshwater pearls

18 x 4mm Swarovski crystal bicones

18 x size 8 or size 9 seed bends

8 x 4mm sterling silver round beads

2'x boli silver end caps

TOOLS Crimping pliers

Wire cutters

Nothing will warm up your winter woolies like a beautiful art glass tassel and bracelet

STEP ONE

Cut the tigertail into 3 x 30cm lengths

STEP TWO

Attach the tigertail strands to one end of the Fab catch and crimp into place

STEP THIREE

Next thread the 3 strands of tigertail through 1 x silver bead

STEP FOUR

Take the 2 outer strands and thread on 1 x seed bead, 1 x freshwater pearl and 1 x 4mm swarovski crystal

STEP FIVE

On the centre strand thread on 1 x seed bead and 1 x 4mm crystal

STEP:SIX

Thread all 3 strands through a silver bead

STEP SEVEN

Repeat steps 4 to 6 twice more Hint - for a larger bracelet add an extra section here

STEP EIGHT

Thread on 1 x end cap, the Art Glass Lentil Bead and the other end cap.

STEP NINE

Now thread on a silver bead and repeal the pattern to look the same as the first side already campleted

STEP TEN

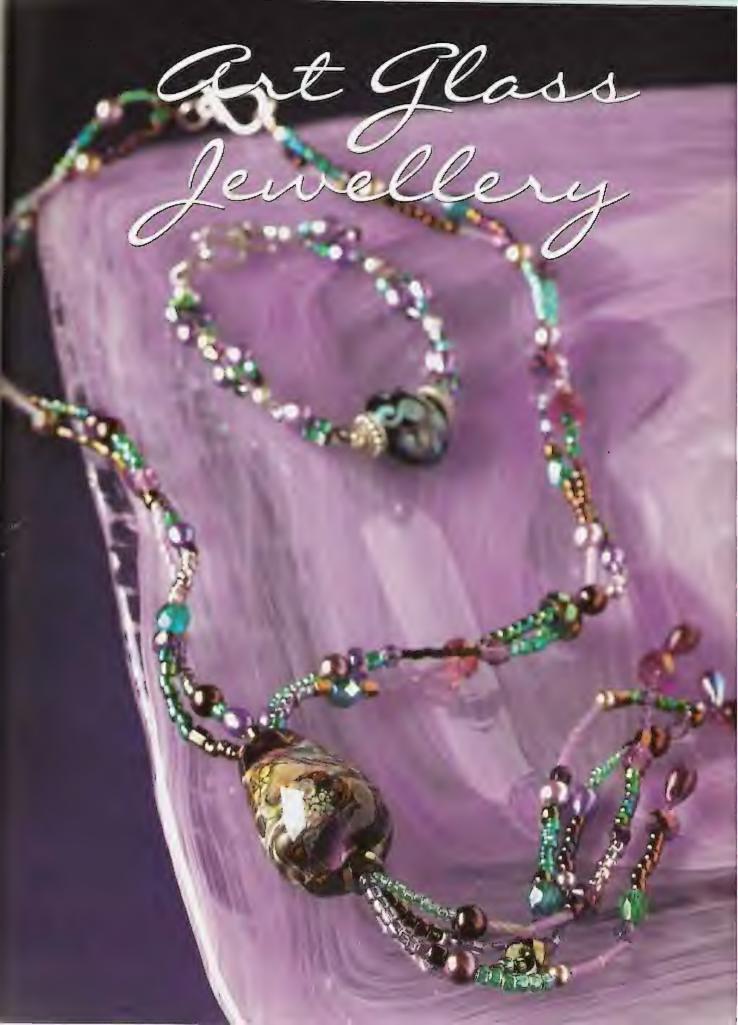

Add the crimp bead to the 3 strands and the other end of the Fob catch. Thread the figertail back through the crimp bead; adjust and then crimp.

STEP ELEVEN

Trim the ends

NECKLACE MATERIALS

Sterling silver Catch or Fob cotch

9 x Crimp beods

2m Tigertail

BEADS Art Glass Feature Bead

6 - 8 x 2g x seed bends different colours, shapes & sizes (total) 6g approx)

16-20 x 6mm Sworovski Pearls in 2 colours

16-20 x 4mm Swarovski Pearls in 2 colours

16-20 x 6mm various coloured Czech glass beads

16-20 x 4mm various coloured Czech glass heads.

1 x 8mm Czech glass Rondels

TOOLS Crimping pliers Wire cutters

STEP TWO

Put 1 x crimp bead and 1 x seed bead and then onother crimp bead on the end of 2 of the Tigertail lengths. Thread through one end of the catch or Fob and then back through the crimp and seed beads. Flatten the crimps to secure the wire. Repeat this for the other side of the catch.

STEP THREE

Begin to thread the boods onto one side of the tiger toil starting with a 4mm Swarovski pearl or 4mm Czech gloss bead. Now thread on 6-8 of the seed beads and then a Swarovski pearl or Czech glass bead: Continue alternating seed and 4 and omm beads until you have completed approx 20-30cm (or desired length) from the Class. Carefully set this strand to one side and take up the next strand on that side. Thread the beads as with the first strand but you will need to stagger them slightly so that the 6mm and 4mm beads are not on the same level in the 2 strands. You can do this by starting with less or more seed beads at the beginning of the pattern. Repeat this pattern for the other 2 strands.

STEP FOUR

Take the 2 strands on the left and gently twist them around each other, repeat this with the other 2 strands and then bring all 4 strands together. Carefully thread them all through a crimp bead, while maintaining the slight twist.

STEP FIVE

Once you have these strands sitting where you would like them, flatten the crimp bead.

DESIGNER'S TIP

Check the bead placement and tension before crimping at this stage:

Glass Bead; this will cover the crimp bead.

STEP SEVEN

Thread the Bmm randelle through the 4 strands and hold firm.

STEP FIGHT

Take one strand and add a 4mm or 6mm bead and then some seed beads: You can continue the pattern in the main part of the necklace here or change the pattern slightly and have the larger beads at the bottom of the lassel section:

DESIGNER'S TIP

Another alternative is to put a drop bead on the bottom of the lossel. If using this alternative you will need to put the crimp bead on before the drop bead and then thread the tiger tail back through the drop bead and some of the other beads and then flatten the crimp bead and trim ony excess tiger tail.

STEP NINE

When you have the tassel the desired length out a crimp bead on the bottom. Check the tension again and crimp the bead, Trim the excess Tigertail. Repeat with the other 3 strands and your necklace is complete.

DESIGNER'S TIP

For variation to the necklace you can use Swarovski crystals and freshwater pearls

Wildlight Studios wildlightstudio@optusnet.com.au www.wildlightstudios.com

MATERIALS Ring shank with loops 16 x 25mm Head Pins

This stunning ring will dance across your finger. It was created by Karin Smith from Adelaide Beads

BEADS

Selected beads for your ring 16 x 6mm and 3mm beads

MATERIALS

5 x 63mm Headnins

57 x 22mm Headnins 5 x 4mm Jumprings

22 x 9mm Jumprings

1 x Chain End

1 x Parrot Class

BEADS

16 x 6mm light-shade round facetted glass beads

10 x 6mm dark-shude round facetted glass beads

5 x 10mm round facetted alass beads

6 x large aval facetted alass beads

10 x small oval facetted glass beads

10 x pinched aval glass bends

5 x large glass beads

5 x metal daggers

TOOLS Chain (flot) nose pliers

Round Nose Pliers

Cutters

This stunning red jasper bracelet has been designed by Bizzarr Beads

STEP ONE

Thread each bead onto a headpin and create a loop at the top using round nose pliers. The five large glass beads will need to be placed on a 63mm headpin, all other beads can be threaded onto a 22mm headpin. See Diagram 1.

Open a 4mm jumpring and attach to the hole at the top of a metal dagger, then close the jumpring, Repeat for all metal daggers.

Hint To open the jumpring, hold onlo it near the join with your pliers. (Flat/Chain nose are usually best, but round nose pliers. can also be used). With your other set of pliers, open the lumpring by pulling one side of the jumpring towards you, while moving the other in the opposite direction. Use one pair of pliers to hold the jumpring while attaching the components.

To close the jumpting, use the technique described above in the opposite way. Push the sides of the jumpring in together to ensure the ring is completely closed.

six sections of the part A pattern, and five sections of each B, C and D pattern. When it comes to connecting your bracelet, if will literally be connected according to this pattern - A, B, C, D, A, B, C, D etc.

Once you have created links on all your beads, you can begin to attach them to jumprings according to the patterns outlined below.

PART A

Open a 9mm jumpring using the technique described in the 'Hint' above, Attach one 6mm light-shade round facetted aloss bead and one large aval facetted glass bead.

You can simply thread your linked beads on the jumpring - there is no need to open your links when attaching the beads to the open jumpring. Close jumpring. Repeat six times:

PART B

Open a 9mm jumpring and attach beads in the following order, a 6mm light-shade round facetted glass bead, a 6mm dark-shade found facetted glass bead, a pinched oval glass bead and a small oval facetted glass bead then class the jumpring. Repeat five times. See Diagram 2

Diagram: I

STEP TWO

This bracelet is comprised of four separate jumpring patterns, which we have labelled parts A, B, C and D. You will need to create

Diagram 2

KITS

Kits are available for \$39.95. Beads can vary from the original but will still be perfectly suited. Findings colours - Rhodium, Black, Gold, Silver, Bronze and Antique. Please specify colour of beads and findings when ordering.

PART C

Open a 9mm jumpring and attach a 10mm round facetted alass bead and a large glass bead, then close the jumpring. Repeat five times;

PART D

Open a 9mm jumpring and attach beads in the following order, a 6mm light-shade round facetted glass bead, a metal dagger with a 4mm jumpring attached, a 6mm dark-shade round facetted glass bead, a pinched oval glass bead, a small oval facetted glass bead then close the jumpring. Repeat live times See Diagram 3

Diagram 3

STEP THREE

Once you have finished creating all the separate sections, you can connect the brocelet together.

Starting at the end of the bracelet, open the 9mm jumpling of one part A section and anach a chain end, ensuring you place it on the righthand side of the beads: See Daigram 4.

While the jumpring is still open, attach this to the middle of one part B section, then close the jumpring. Hint - The middle of this

Diagram 4

side is between the 6min dark shade local and the pinched oval head

STEP FOUR

Open the 9mm jumpning of one part C section and attach it to the part B jumpring in the same way as you attached part A in the middle of the part B pattern. Hint - The middle of this opposite side is between the 6mm light-shade facet and the small oval local. Your part C jumpring should be sitting opposite your part A jumpring, with 2 beads new falling to each side of the part B section. Doing this ensures beads are evenly staggered along both sides of your bracelet.

While your part C jumpring is still open, offices one part D section to it. Part C should be attached to the middle of the part D bead pattern. Hint the middle of this side is between the 60m dark-shade facel and the pinched bood. Close jumpring

STEP FIVE

You have now completed one section of the brocelet parts A, B, C and D are linked together. Complete the bracelet by joining the remaining sections together according to the same postern.

WIN

this bracelet!

For details see out Beads Glorious **Beads Competition** on pages 66 and 67.

i sen the 9mm jumpring from your next == 4 section and attach it to the middle of a san D bead pattern. Hint - the middle of - is between the 6mm liabl-shade facet == == small oval facet. The jumpring from ___ A should now sit directly opposite the - C jumpring, with two beads from the part mpring. Continue bracelet pattern until - sems are joined.

TEE SIX

in an your bracelet, open your last 9mm menng and attach a closp. You can then _____ this jumpring to the last section of tur brocelet. See Diagram 5.

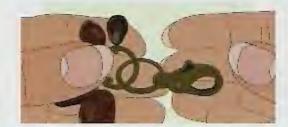

Diagram 1

Bizzarr Beads 550 City Road South Melbourne Victoria 3205 Ph: (03) 9645 9458 Email: info@bizzarrbeads.com.au Website - www.bizzarrbeads.com.au

MATERIALS Approx 44 normal Grimps

2 x Charlotte Crimps

1 x 10mm or 13mm Perrol Class

La Extension Chain

Approx 120cm at Tiger Tail (depending upon length required)

BEADS

Approx 2) Feature Beads (use more or less depending upon length required)

Approx 42 size 8 Seed Beads (2 for each feature band)

TOOLS Wire cutters

Flat Nose Pliers

Beed Mat or Board

This simple elegant design uses a combination of metallic glass cubes and rectangles, and smoke brown glass and is designed by Bead World.

DESIGNER'S TIP

You could also use bronze coloured tiger tail, black crimps, charlotte crimps, parrot clasp and extension chain for greater effect.

STEP ONE

Cut three lengths of tiger fail to your desired length, plus approximately from extra so you can adjust the position of your heads once the final design is complete.

Hint In this design the lengths have been cut nearly the same so that the three strands blend together, however, you can cut them in three staggered lengths so they have apart.

We have also placed our beads so that when the piece hangs, they are clustered tagether. Again, you can stagger the placement of the beads if preferred so the piece will look 'fuller' when worn

With this design it is better to lay the three strands out flat on your bead mat and thread all the beads first, so you can move them around until you are happy with the position of all the beads before you begin crimping.

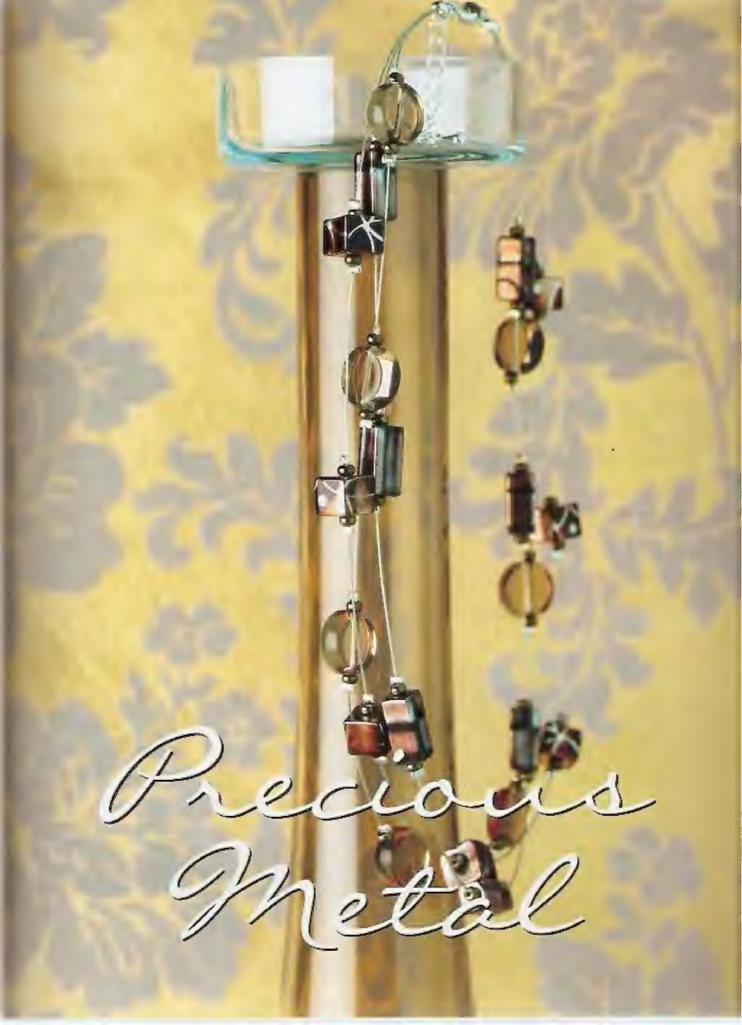

STEP TWO

Starting with the first strand, thread a feature bead and place it in the centre? Thread a complementary seed bead and then crimp each side. Hint—Use black crimps which will visually disappear.

Then, alternatively on each side, thread another crimp; seed bead, feature bead, sees bead, then a crimp. Complete the sequence allowing between 4-5cm between each bead sequence. Finish the beads approx 6-10cm from each end.

Rating

WIN

this necklace!

For details see our Beads Glarious Beads Competition on pages 66 and 67.

STEP THREE

Using alternate feature beads, thread the other two strands in the same way.

STEP FOUR

Once all threading is complete, lay the design out flat on your bead mot and amonge your bead sequences into their final position.

STEP FIVE

Starting at the centre, hold the bead sequence firmly together and, using your flat nose pliers or crimping tool, begin to flatten the crimps to hold the bead sequences in place.

Once the first strand is completely crimped, complete the other two strands, keeping an eye on where the boads are sitting in relation to the beads on the other strand/s.

STEP SIX

Once all crimping is complete, hold the three strands up together and move the strands around until they are sitting the way you want. Then, holding the three strands together

cut the ends so they are all even and feed a charlotte crimp over the end of the three wires, then crimp all three wires together with one crimp.

Slide the charlette crimp up over the crimped wire ends and fold the cup so it captures the crimped ends. Do this for both ends.

STEP SEVEN

Using your flat nosed pliers to close, attach your charlotte crimp on one end to a parrot clasp and on the other end to an extension chain.

Bead World Ph = (07)5534 1333 for enquiries www.beadworld.com.au

I x Sterling silver toggle dasp

30cm (12") x Sterling silver 0.7mm (opprox 22 gauge) round wire

6 x 3mm Sterling crimp covers

Approx 84 to 100 x Sterling silver Imm (approx 18 gauge) jump rings - with 3.5mm inside diameter

BEADS

3.1 Gemstone nuggets (this bracelet uses white hawlite)

Tip - the hole diameters vory in huggets, Ensure you select nuggets that can excommedate 0.7mm wire

TOOLS

Wire naters

Round nose pliers

Flat nose pliers

Chain nose pliers

Featuring three howlite nuggets, this bracelet is designed by Pam Kenward and perfect for intermediate beaders

STEP ONE

Centre a nugget on a 90 mm length of wire. At one end, bend the wire of a 90 degree angle - 3mm from the nugget. Form a loop around the round nose pliers with the wire toil, about halfway up the pliers. Mark the pliers with a permanent pen at this point, and use this as a guideline to ensure subsequent loops are a uniform size. Slide the togale ring part of the clasp along the wire tail and into the loop. To complete the wrapped loop; arlp the loop with the chain gose pliers and wron the wire tail around the neck once to secure and then cut the wire. See Diagram 1. It may look a little messy but don't worry as this will be corrected in the next step!

Diagram 1

SHEP IWO

Open a grimp cover. Carefully position it on the neck of the wire between the loop and the nugget. Support it from underneath. with your finger and with the chain nose pliers in your other hand; gently squeeze the crimp cover closed to hide the wire wrop. See Diagram 2.

Diagram 2

STEP THREE

Make another wrapped loop on the other side of the raugget and conceal it with a crir cover as before. See Diagram 3.

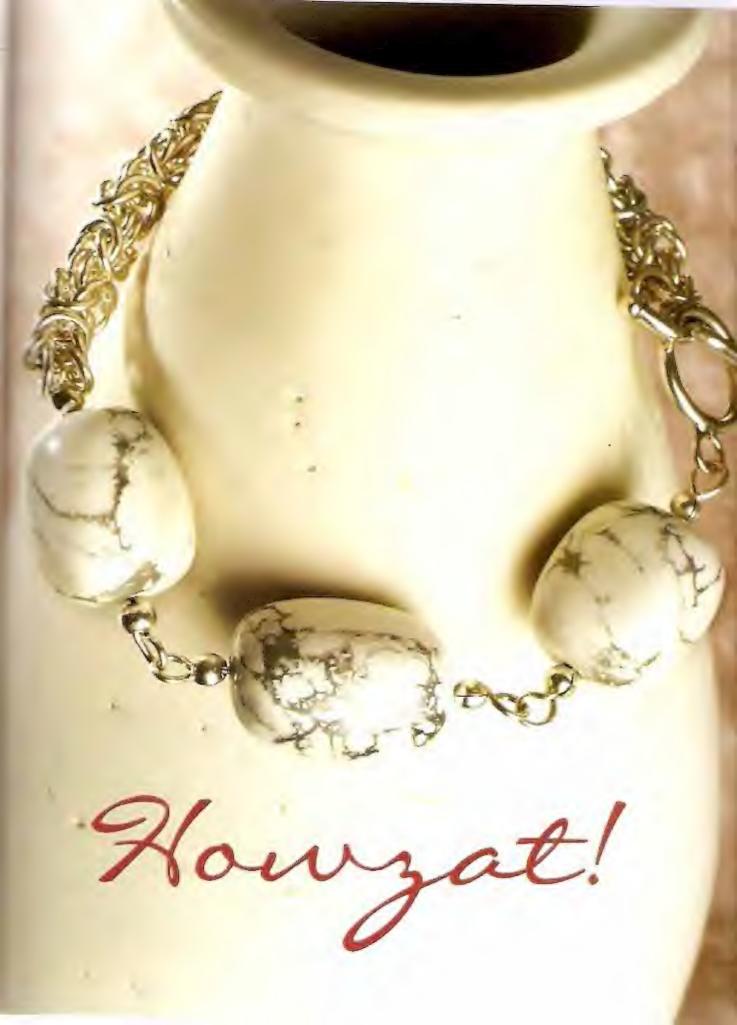

STEP FOUR Join the remaining two nuggets to the first using the previous wire wroppling techniques.

STEP FIVE

To close an open jump ring, the correct technique is to grosp the open ring leither side of the opening with flat ar chain nose pliers. Slightly turn one wrist towards your body and turn the other wrist away from your body - allow the ends of the ring to meet. See Diagram 4. To open a closed

WIN

this bracelet! For details see our Beads Glorious Beads Competition on pages 58 and 59.

ring, reverse that action - never pull the ring apart in opposite directions as it will distant the shape:

Diagram 4

Connect two jump rings to the loop of the end of the third nugget and then add two more pairs of rings to form a 2 in 2 chain. See Diagram 5. In the diagrams, the last set at rings is shown in black for clarity.

Diagram 6

Push these apart slightly to access the black rings and connect two new rings, one of a time through the black pair. See Diagram 7. This will lock the design in place.

Diagram 5

STEP SIX

Fold back the last set of (black) rings, to position them each side and slightly: overlapping the first pair of rings - then hold them firmly between your thumb and

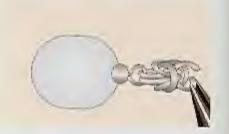

Diagram 7

STEP SEVEN

Add on two more pairs of rings to the chain. Repeat Steps 6 and 7 until the bracelet is the desired length and connect the Taggle Bar with two rings.

B x 2.5m of Imm p leather cord total of 20m

1.5m x chain

12-14 x head pins

12-14 x filigree balls

2 x 0 rings large

BEADS

4 x 30 heads from Indian bead mix (total 120) 1.5—2mm length

1 x 30mm Foil bend

74-28 x size 6 seed beads

A P'perfect belt for jeans and dressy casual look that you can braid up in an afternoon

The finished length of this belt is 1m - 1.1m (not including tassel lengths of 40cm) it can be worn on the hips or waist as desired

DESIGNER'S NOTES

You will learn to braid four strands into a round rope in this project. Practice with plain string how to braid the four strands prior to starting and you will master your project a lot easier. You will also find it easier if you have a four board you can pin your work to as you braid. Alternately sticky tape your project approx 100-125mm from the edge of a table and work over the edge.

STEP ONE

Lay out all the 8 strands of pleather, tie one large over handed knot with the 8 strands of pleather 40 cm from one of the ends.

SIEP IWO

Stick or pin down the long section and work on the 40 cm end. Divide the 8 strands into 2 groups of 4 strands and braid each group till it is approx 3cm – 3.5cm. Join the 2 groups together and tie another large overhanded knot with all 8 strands. You have created a button hale for the foil bead that will be placed on the other end. See Diagram 1:

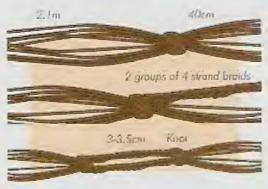

Diagram 1

STEP THEF

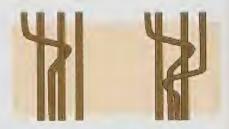

Set aside 28 beads for tassel ends. Turn and stick or pin short end of your work. Working on the long section; on 4 of the strands place a bead and knot randomly so that there is a bead approx every 2-5cm on at least 1 of the strands at any given spot on the braid when is grouped together. Hint—The aim here is to have beads spread along the strands as you braid without having to thread them on as you work. Use all the beads but make sure you leave the last 45-50cm without beads. See Diagram 2:

Diagram 2

STEP ROLLR

Take 1 strand with beads and 1 strand without beads and hold them together, treat these 2 strands as if they are 1 strand for the braiding section; you will now have 4 lats of strands. Commence braiding as per the instructions for braiding. As you work, slide the beads up or down as you please. Hint lakes a bit of patience to keep the work tight and neat but is worth the effort. Don't worry loo much if there seems to be gaps in your work as you will be winding the chain around these sections

Four Strand Braid

STEP FIVE

When you have reached the desired length, or approx 15 cm from the end of the pleather tie all the strands into an overhanded knot. Take 2 strands of p'leather and string on the large foil bead, with the remaining 6 strands divide them into 2 groups of 3 strands. See Diagram 3

Diogram 3

Do a simple 3 strand plait until they measure approx 3cm to each group; place: I on each side at the fail bead. Jain all B strands with an overhanded knot. Your fail bead should hi tightly through the button hale you made on the other and

Place large O ring next to the knot on inside edge of the button hole and attach the chain. Wrop the chain ground the braided section of belt wrapping it into and between the beads. At the end of the braiding section place the O ring next to the knot and attach the wrapped end of chain. Trim off any excess.

STEPSMANEN

Thread 1 filigree ball and 2 size 6 seed beads on to the head pin, (12-14 times) now laying out your belt and place of approx the same spacing your pin heads on the chain and wrop loosely so they move treely

STEP ERED IT

Now randomly place your remaining beads on the tessel, end with a small light knot under the last bead. Also place a small date of nail polish to seal the knot under the bood, Hint On a few tassels. you can place more than I bead to brake up the tassel and

Heard it Through the Grapevine

TULLY JAMES TALKS TO ASHLEE MOUAT – AN 11 YEAR OLD DESIGNER WITH AN IMPRESSIVE BODY OF WORK

WHAT IS ONE TO DO when one has several teeth removed from one's mouth?

Well naturally, you find the inspiration for crafting beautiful beaded jewellery, that's what!

And this is exactly how it all started

for 11 year old Ashlee Mouat... Whilst being stuck at home for several days in May 2005, Ashlee became exasperatingly bored after her routine extractions. For some kids this may have seemed like the perfect break from school and a great reason to slouch on the couch. Not Ashlee, Her mother Kerrie, a very accomplished bear maker in her own right, suggested she utilise the insurmountable creative resources to be found in their Hillside home and make full use of this free time by stringing together some simple plastic beaded bracelets.

As an added incentive Mum pointed out that if Ashlee enjoyed it and made enough bracelets, she could even join her for a spot at the next bear show!

Needless to say, Ashlee did not waste any time; evidently she had inherited the creative gene, and using this 'knack' she produced the pieces that enabled her to have her own space on Kerrie's table at the June 2005 thow in Queensland

Her beads were rightly a raging success and sold straight off the stand, so welling her enthusiasm (as if she needed iil). The \$120 she grossed - pretty dam good for a first show combined with mum's continued support, brought with it the linancial means to purchase an assortment of gorgeous glass beads in preparation for more work.

In what must have turned out to be a particularly busy July in 2005, Ashlee set to work developing her basics with her prized new glass medium; and found that she could now create even more stunning beaded originals. During the exciting hunt for precious beads (Ashlee finds most of her beads at the St. Kilda wholesaler Spacetrader Beads and at various bead shows), a love for antiques and vintage was revealed

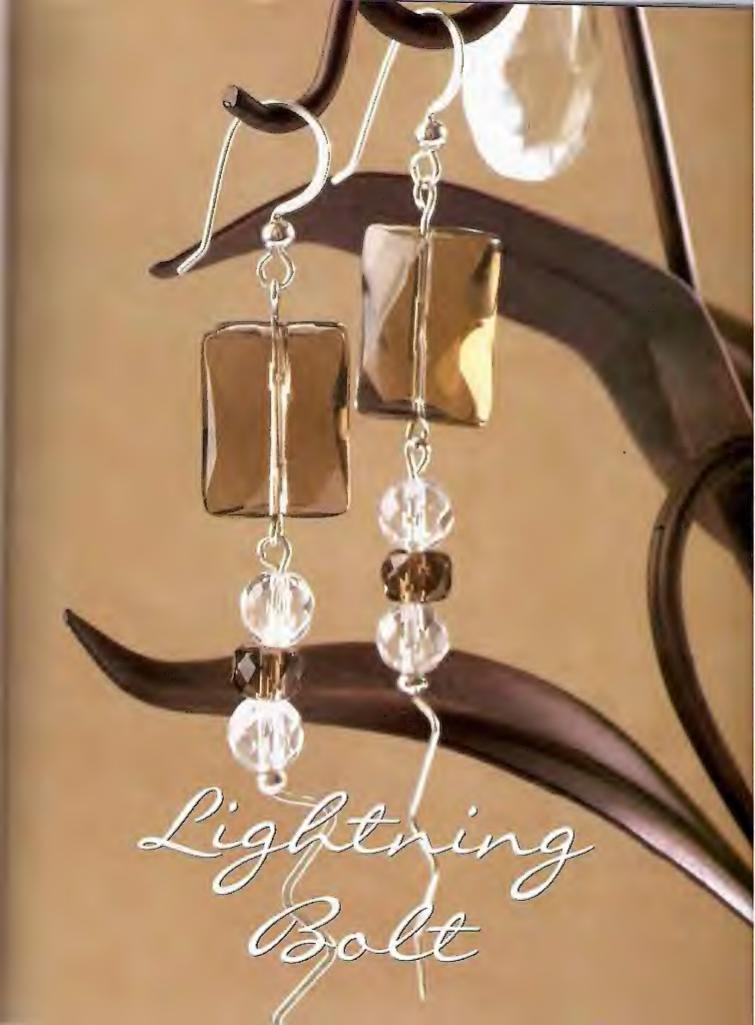

so ensued much use of soft pink, rose and burgundy beads and unlique rese and gold chain along with thick silver chain, complementing sea blues, greens, rich

purples and lilacs. She also finds the glorious colours in Indian glass beads an irresistible complement to her style. Her preferred pieces to make are "seriously chunky, jingling bracelets", earnings and "necklaces with uneven bead formations and hanging chains" and lots of layering. When asking for descriptions of Ashlee's work I discovered what could very well be called her 'signature' - the beautiful and self tilled 'Grapevine. design' - mainly used for the earnings and necklaces - it involves draping clusters of beads from chains or earning hooks and it quite literally resembles a bunch of grapes. The results are delicately striking masterpieces, complete with soft tassels and a fabulously feminine air.

By the time the next bear show popped up last August in Melbourne, Ashlee had a big enough body of work by her side to garner a huge half table display. alongside Kerrie and all the hears - not a bed accomplishment in the mere 3 months since larewelling her teeth!

Kerrie gave Ashlee creative control over her half of the setup area, where further flair for the anistic was shown, as she chose to embellish her jewellery with a gargeous vinalge theme

Her preferred pieces to make are "seriously chunky, malina burrennts" corrings and "neclouces. with uneven bend formations and hanging chains' and lots of layering.

"There is a shop negr our home which sells beautiful ostume jewellery that mspires me And I have been to the bead show in Melbourne and was inspired by seeing ull the beads!"

complete with billowing fabrics, mirrors and cherubs. She decided one of the best ways to display her jewellery, instead of laying them directly on the table unit, was to hang the individual items from antique candelabres. By now she had created a logo for herself simple. and smart 'Ashlee's Jewellery' - and so, with a bunch of handcrafted swing togs under her ann she was ready for the show!

Once again, her work proved popular with the crowds - and this time it caught the eye of a local Melbourne scout too! Chive from Madlilly Linens & Gifts in the Woodgrove Centre, Melton, spotted Ashlee's work and was keen to get it into her store. She spoke with the nilted young designer during the show, purchased a range of jewellery and it was not long before Ashlee's work was aracina the shelves.

Within one week Chris had sold all the pieces she had selected to her happy customers and needed to place further orders. Ashlee and Kerrie now regularly head into Madlilly where Chris chooses which pieces she likes

Where, you might ask, does a 6th grader who also loves playing netball and soccer in her 'spare time' - possibly find the hours and inspiration for such creative entrepreneurship?

It is daily she says "I sit at the coffee table of night, while watching television (The

Simpsons is her favorinte show) and make my lewellery then. Also on weekends." The weekends are coincidentally the same time when Kerrie says the revolving door carrying Ashlee's friends swings into action, so I am guessing Ashlee could be the young superwoman in disquise!

Humour, love and support seem to be the key words of wisdom for the artistic trio that is the Mouat family.

Ashlee's dad David assists Kerrie with her bear website, further develops Ashlee's evidently natural business acumen, and performs in one side of the famous 'Ashlee & Dad' comedy duo, which Kemie says provides hours worth of witty laughter

The unwavering mutual maturing that the Moual wamen have shown for each other's creative latents - Ashlee has been unafficial manager and colour consultant to Kerrie in her years as the head of her company Best Dressed Bears - is quite obviously deeply responsible for the success of both of these highly talented airls!

This writer was excited to learn whilst speaking with Ashlee and Kemie that there is also a new member of the Mouat clan - 6 month old Tyler o Pommeronian cross whom Ashfae acquired with her own funds funder the proviso. of course, that she be his primary carer) after dilligently saving up each jewellery sale

Does Ashlee have any inspirational tips for other aspiring beading jewellers?

"Maybe you could buy a kit of plastic beads and make a basic elastic bracelet, and then if you enjoy making it you can get better beads and explore some more interesting designs. Magazines are a great way to learn how to create different types of jewellery because they quite often have projects in them."

More on the subject of inspiration. "There is a shap near our home which sells beautiful costume jewellery that inspires me. And I have been to the bead show in Melbourne and was inspired by seeing all the beads!"

Quite obviously Ashlee is a girl with her head firmly on her shoulders.

So, where to from here, for this clever and creative individual? Ashlee is happy to continue doing what she loves — making gargeous jewellery, playing with friends, training her pup Tyler, keeping active with her various sports, creating things on the computer, embarking on a planned family trip to America, putting money aside for her next purchase—on iPod nano:...oh and she "likes to draw"...

Well whatever it is that the luture holds, one thing is for sure, the world is certainly Ashlee's oyster and it will be a coloulul adventure.

Go Girll

- 2 x sterling silver car hooks
- 4 x sterling silver eye pins - 50mm

BEADS

- 2 x faceted rectangle smoky quartz beads -15mm x 12mm
- 2 x faceted smoky quartz barrel bends - 6mm
- 4 x round faceted quartz beads - 6mm
- 2 x sterling silver beads -2.5mm

TOOLS Hammer x 2

Kits can be purchased for \$8.50 plus postage.

These gargeous earrings have been designed by Tara Sinclair of Fire and Ice Concepts and are perfect for beginner beaders.

DESIGNER'S TIP

If you want each earing to be exact, hammer two nails into a piece of scrap wood and bend eye pin gently around each nail. Otherwise use a marker pen and ruler to get the same measurements and bend with round nose pliers.

STEP ONE

Place faceted rectangle bead anto the eye pin. Bend the pin at a right angle to bead and trim to approximately 1cm above bead. Using round nose pliers make an eye loop.

STEP TWO

Open the loop on ear hook, and place rectangle section (above) onto if - close the: loop.

STEP THREE

Take another eye pin, thread the round quartz bead, barrel smoky quartz bead, another round quartz bead and one sterling silver bead onto it. Bend piniat right angle. Zig zag the rest of the pin into desired shape. (See tip)

STEP FOUR

Gently flatten the zig zag portion of the pin using a hammer on a hard surface. Using two hammers is ideal (like on anvil). Note: Four or five taps should achieve the desired effect. Over flattening will curl and mark the surface of the pin:

STEP FIVE

Repeal the above steps to make the 2nd earring.

Fire and Ice Concepts 35 Main Street Upwey Victoria 3158. Ph: (03) 9754 1077

KITS

Kits available for this necklace

Emily Barnes designed this elegant and delicate necklace using semiprecious stones and freshwater pearls - just the thing to perfect your wrapped loops

DESIGNER'S NOTE

Customise this necklace by experimenting with different types and sizes of beads; chain; and feature links; just ensure that your wire or head pins lit through the chain links. It's also a great way to use up odd or leftover beads. Note - experience in wire work is needed for this project.

STEP ONE

Cut the 44cm length of chain into two pieces with culting pliers; 1 x 40cm place and 1 x 4cm piece. Set the shorter length oxide. Cut o 5cm piece of gold filled wire with the cutting pliers. Using round riose pliers, make a 90 degree bend in the wire 20mm from one end of the wire.

STEP TWO

Make a loop and slide on the clasp. Use the remaining wire to wrap around the base of the loop 3 times and trim any excess.

STEP THREE

Thread 1 x golden brown FWP onto the other and of the wire. Make another loop 2mm from the pearl, and slide on the end of the chain. Wrap the remaining wire 3 times around the base of the loop and trim.

STEP FOUR

Take another 5cm piace of wire and make a wrapped loop as above to secure the other end of the chain. Thread a golden brown FWP onto the other end of the wire, and create a wrapped loop.

STEP FIVE

Using 3 x bronze FWPs and 3 x 5cm lengths of wire, create an extension chain for the necklace by connecting the pearls. Instead of creating a wrapped loop for the final pearl, clip the wire leaving a 3mm toil. Using the flat nosed pliets, bend the wire over itself and apply pressure to crimp the wire and hold the poorl in place.

STEP SIX

With the clasp closed, place the neckloce on a flat surface. Find the centre of the chain and thread the chain through the link. Pull the class end of the chain through the loop formed with the chain and poll tight. This is called a Ring Hitch knot.

STEP SEVEN

Create a loop with another 5cm length of wire and slip on the link, wrapping the excess

WIN

and 59.

this necklace! For details see our Beads Glarious **Beads Competition** on pages 58

around the loop. Instead of threading a pearl, leave the wire bare. Bend the wire 2mm from the end of the wropped wire. Create another wrapped loop, threading on the 4cm piece of chain.

ALTERNATIVE LINK.

Make your own link by wrapping an 8cm piece of wire around a utensil handle or ring mandrel. Holding the wire firmly, make a 90 degree bend in both ends of the wire where they meet. Clip 1 end, leaving a 2mm. fail. 2imm from the bend on the longer end of the wire, make another 90 degree bend and create a loop. Wrap the remaining wire around the loop being careful to secure the shorter end of the wire by wrapping it once ground the base of the loop.

STEP FIGHT

Cut a 3cm length of wire and make a 90 degree bend for a wrapped loop 20mm from one end. Attach the last link of the 4cm piece of chain to the loop, wrap and trim the wire. Slip on a bronze FWP and Irim the remaining wire to within 3mm of the peorl. Bend the wire over itself with the flat nosed pliers and crimp Repeat with the remaining 15 bronze FWPs. spacing them evenly along the length of the chain. Repeat with 5 smoky quartz discs and 4 cream FWPs; filling in any gaps to create an even shape:

BEADS

Silver set labradante pendant

6 x 8mm Bali silver beads

7 x 25cm strands of 6-8mm red jasper gemstone thips (exten is allowed to ensure you get the right combination of thips)

TOOLS

Cullers

Flot nove pliers

Round nose pliers

Designed by Sacha Harris and made from red jasper, this necklace is easier to make than it looks. Great for beginners looking for a challenge

DESIGNER'S NOTE

I made this necklace for a beautiful lady called Kyra – I chose red jasper and labradarite for their healing properties and their beautiful earthy tones. You can choose whichever gernstones you like for a different look.

STEP ONE

Take Solt Flex and cut into 2 strands. One strand must be 73cm, the other 77cm.

Thread your local pendant anto the 2 strands and place if in the middle.

STEP TWO

Add jusper chips to each stand, on each side of the pendant; this neckloce uses about 18 chips on each segment. Sort your beads to ensure the segments are equal lengths.

STEP THREE

Thread the 2 strands through 1 x Bali silver bead. Do this again on the other side of the pendant. The outside strand will be slightly longer as it sits around the internal strand.

STEP FOUR

Repeat steps 2 and 3, adding a Bali silver bead approximately every 18 beads. Keep adjusting the chips so your necklace is even. Continue this 2 times.

STEP FIVE

Thread unother 12 chips anto all 4 strands for the last segment.

STEP SIX

Put your neckloce on a flat surface to check that the strands do not curve outwards too much between the Bali silver beads. If needed, adjust the beads on each side. Note – different combinations of chips may work better than others.

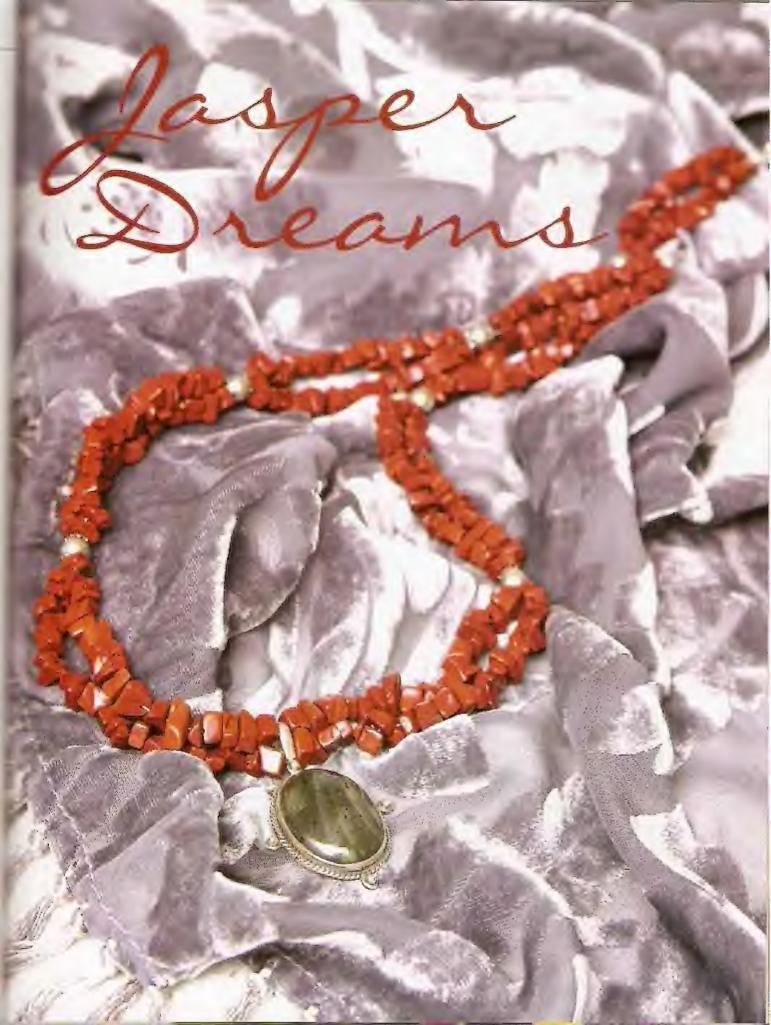

STEP SEVEN

Thread the strands through a charlotte crimp and add 2 x crimp beads. Take the 2 strands and thread them through the crimps. Flatten both crimps with flat nose pliers. If desired add a dab of Superglue or liquid cement. Repeat on other side.

Hint – while getting ready to crimp the second side take care not to pull the strands too tight as this will cause the chips to squash together and have no room to move. Leave about 1-2mm gap between the beads and the crimp. Close the charlotte crimps and curl the loops of the crimps closed with your painty nose pliers.

STEP EIGHT

Finally thread a jump sing on to each charlotte crimp loop and attach the hook end of your clasp to one jump ring and the clasp tag to the other jump ring. Clase the jump rings with your pliers.

Chain Nose Pliers

This postel cluster necklace is designed by Nicole Gilbert from Empire Beads

DESIGNER'S TIP

This necklace is assembled by attaching clusters of beads to a chain. To create a balanced shape, clusters should contain more beads and be longer in length as you move towards the centre of the necklace. Length is created by linking together beads and creating short bead chains:

STEP ONE

Laying out your design: Arrange your beads into 11 groups with good variance in colour and shape. The closer a group is to the centre of the necklace, the higher the number of beads it should contain. As a guide, our necklace starts with 4 beads in the outermost clusters and ends with 10 beads in the centre cluster.

STEP TWO

Adding Length to Clusters: Add length to the clusters in the centre by creating bead chains

with two or three links. Remember that the centremost cluster should be the longest and most dense cluster. This will give you argood indication of how your neckloce will look when finished.

STEP THREE

Creating Your Bead Clusters: In each group, place all beads not already part of a chain, anto an individual headpin. Join the cluster together using a jump ring. See diagram 1 and 2.

Diagram 1

Diagram 2

STEP FOUR

Attaching Clusters to the Chain: Attach the centre d'estec to the centre link of your chain Evenly space your other clusters either side of the centre cluster and attach by opening up the jump ring and linking to the chain. Finish off by attaching parrol clasp and extension chain to the ends of your cable chain.

MATERIALS 100cm Stretch Floss/Cord 1 x Worth Foto:

BEADS Assorted Lampwork Beads (approx 52 beads, 8-10mm)

TOOLS Scissors

Glue-

1 x Needle

a watch!

For details see our Beads Glorious Beads Competition on pages 66

This lamp work watch band has been designed by Bead Needs

DESIGNER'S NOTE

As watches are worn so regularly it can be a good idea to use two strands of cord for added strength.

STEP ONE

Cut three lengths of stretch cord twice the size of your wrist, allowing extra to work with Jusually 5-10cm).

STEP TWO

Thread your first cord through the top of the watch, Situate the lace about one quarter the way along the stretch cord.

STEP THREE

On the long end of the cord, thread enough beads to go around your wrist once lapprox

13 beads before going through the bose of the watch face.

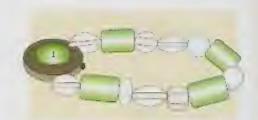

Diagram 1

STEP FOUR

Place approx 6-7 beads on either side of the two empty strands. Holding the ends tagether, check the fit of the band making sure both sides are even.

Diagram 2

STEP FIVE

Tie with a half knot and trim your ends within 5-10mm. (Making the knot around the nose of a pair of round nose pliers will make it easy to slide the knot down close to beads). Glue the knot and slip into a bead to hide it.

STEP 6

For a chunkier look, more strands can be added by repeating steps 1 to 5.

Flot-nose pliers

Wire cutters

this bracelet!

Rends Glorieus Boads Competition on pages 66 and 67.

Inspired by nature and her natural beauty this Mother of Pearl Shell Bracelet has been designed by Gina from Beadazzled.

STEP ONE

With the wire cutters cut a piece of tigertail that wrops comfortably twice around your wrist and allow at least 10mm extra. Cut the tigerfail in half.

AFP IWO

Holding the two pieces: of tigertail evenly together, thread them through the charlotte crimp hole, add one crimp and crimp down with the flat-nose pliers. Fold the charlotte crimp over to hide the crimp. Attach the parrol clasp to the open hook of the charlotte crimp and gently press closed.

STEP THREE

Begin threading the poorls onto both strands of ligertail. First the pale green pearl, then

the map chip, silver treshwater pearl and the turquoise nugget.

Next separate each piece of tigertail and thread a silver freshwater pearl on to each, followed with a green pearl, the mop chip and lastly another silver pearl.

STEP FOUR

Holding both tigertails together thread through the turquoise nugget. Then again separate each tigertail and continue the pattern; a silver freshwater; a pale green, a mop chip; another silver freshwater. Again. holding both tigertails thread them together through the last turquoise nugget.

STEP FIVE

With both tigertoils together thread the remaining beads in sequence:

pole green pearl, map chip and lastly the remaining green pearl. Now thread the charlotte crimp.

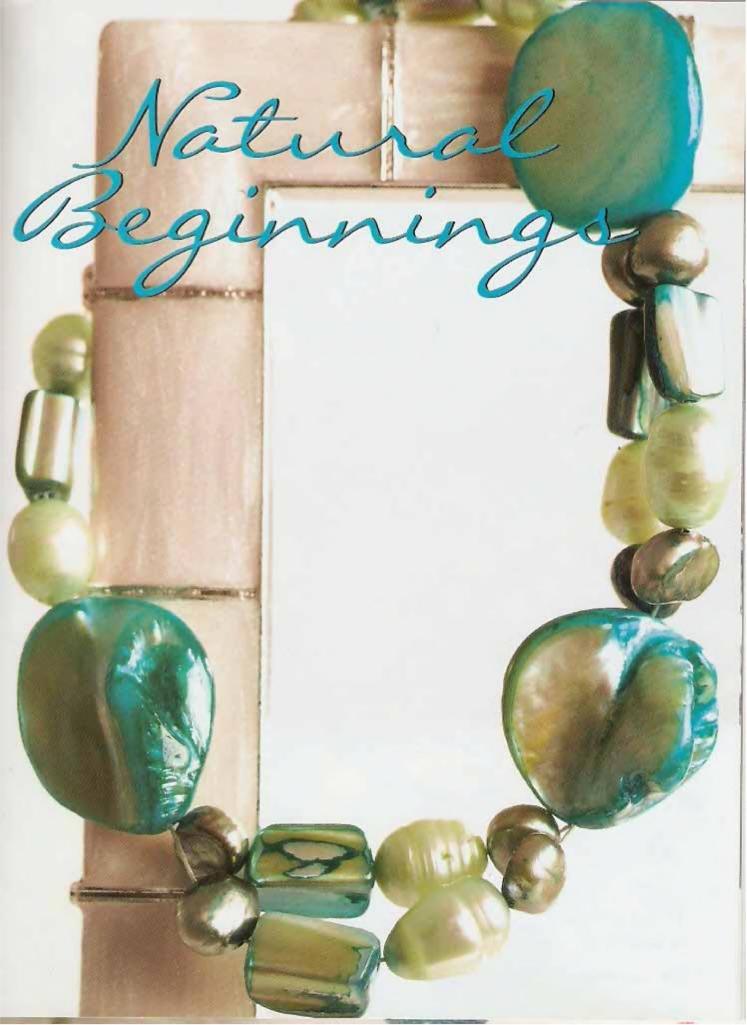

STEP SIX

Holding anto both tigertails, hold the bracelet up to ensure that all the beads settle nicely in place and to ensure there are no undesirable gaps between the beads. Add the crimp and crimp with the flat-nose pliers inside the charlotte crimp. With the pliers gently hold over the charlotte crimp to cover the crimp: Put the jump-ring or split ring into the charlotte crimp hook and gently bend over.

Yoila a natural beauty!!!

Beadazzled Shop 1 / 4 Rowling St Casuarina NT 0811 Ph: (08) 8928 0989

4 metres of tigertail

1 watch lob clasp

4 x medium crimps

This gargeous necklace is designed by hArt beAd for the intermediate to experienced beader

BEADS

16 x 10mm glass hearts

12 x 10mm tube, frosted glass

20 x 4mm offset fresh water pearls

12 x 6mm round, frosted gloss

B x 4mm round, frosted alass

20 x 4mm square AB crystal

20 x 4mm glass rondelle (pale)

20 x 2mm facetted glass

Round nose pliers

Snipe nose pliers

Diagonal cutters

10c piece

45 x coin silver ball spacers

TOOLS STEP ONE

Cut 3 pieces of tigertail at 2.30 metres and place a 10 cent piece and your beads in groups in front of you, then start by leaving a generous 10cm tail on the first strand. Note

The designer has used 10 different beads.

10cm lail

Diagram 1

STEP TWO

Place 4 beads (random selection, see designer tips), onto the tigertail. Swing your tigertail to around the size of a 10 cent piece,

DESIGNER'S TIP

Because the pattern in this design is created randomly place the larger accent beads every 3 rounds or so, and after you have produced the first strand use this strand as a design guide for the other two strands. By placing it on your bead mat, you can see as you go along where you need to place the larger accent beads, and ensure you are not bunching up one type of bead in the same area of the necklace. As simple as this technique is, to get a visually balanced necklace you must watch your bead placement as you go. Another tip is do not go too large with your accent bead - about 10mm is big enough in this design. Feel free to change the colours, mix your colours and change the shapes and style of the beads and you will create a myriad of unique pieces:

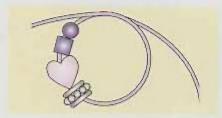

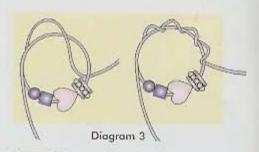

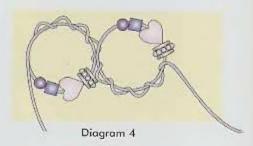

Diagram 2

(see Diagram 2) while holding it all together with your thumb and forefinger loop the thread through four times; this will secure the beads. See Diagram 3

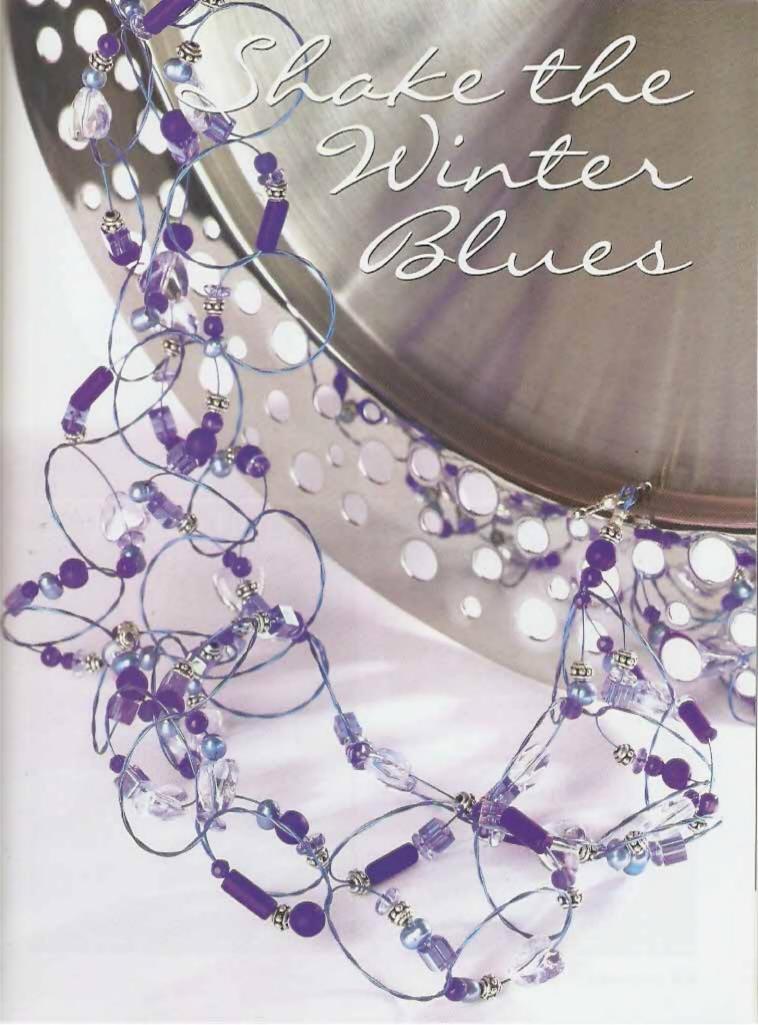

STEP THREE

Turn your work over, thread on your next four beads (random selection), create the round (using the 10 cent piece as your size guide) hold onto the join, making sure your beads are on the opposite side of the round from the first four, then loop the thread through four times on the opposite side. See Diagram 4.

Repeat step two and step three until you have created 16 loops. Now you have your first strand.

STEP FIVE

Create two more strands, remember to use your first strand as your design guide. Now using your snipe nose pliers straighten the end of the tigertail so it is at a 45 degree angle to the round, repeat on all ends of the strands

To finish bring the three strands together, thread on a coin silver bead, a blue frosted 6mm round bead and another coin silver bead, two medium crimps then one side of the clasp, hold onto the three strands with your round nose pliers right up close to the crimps. Carefully thread the tigertail back into the crimps and three beads, tighten, squeeze close your crimps with your snipe nose pliers, cut off excess tigertail. Then repeat on other end attaching the other side of watch fob clasp and finishing your creation.

The shake the winter blues kit may contain a few extra beads and is available from hArt beAd, 8a Hollings Road, Denmark, Western Australia. The kit costs \$45.00 plus \$5.00 postage and handling. Please leave a week for arrival, happy beading from hArt beAd.
